Tell the story of Elias...

In a bustling futuristic city...

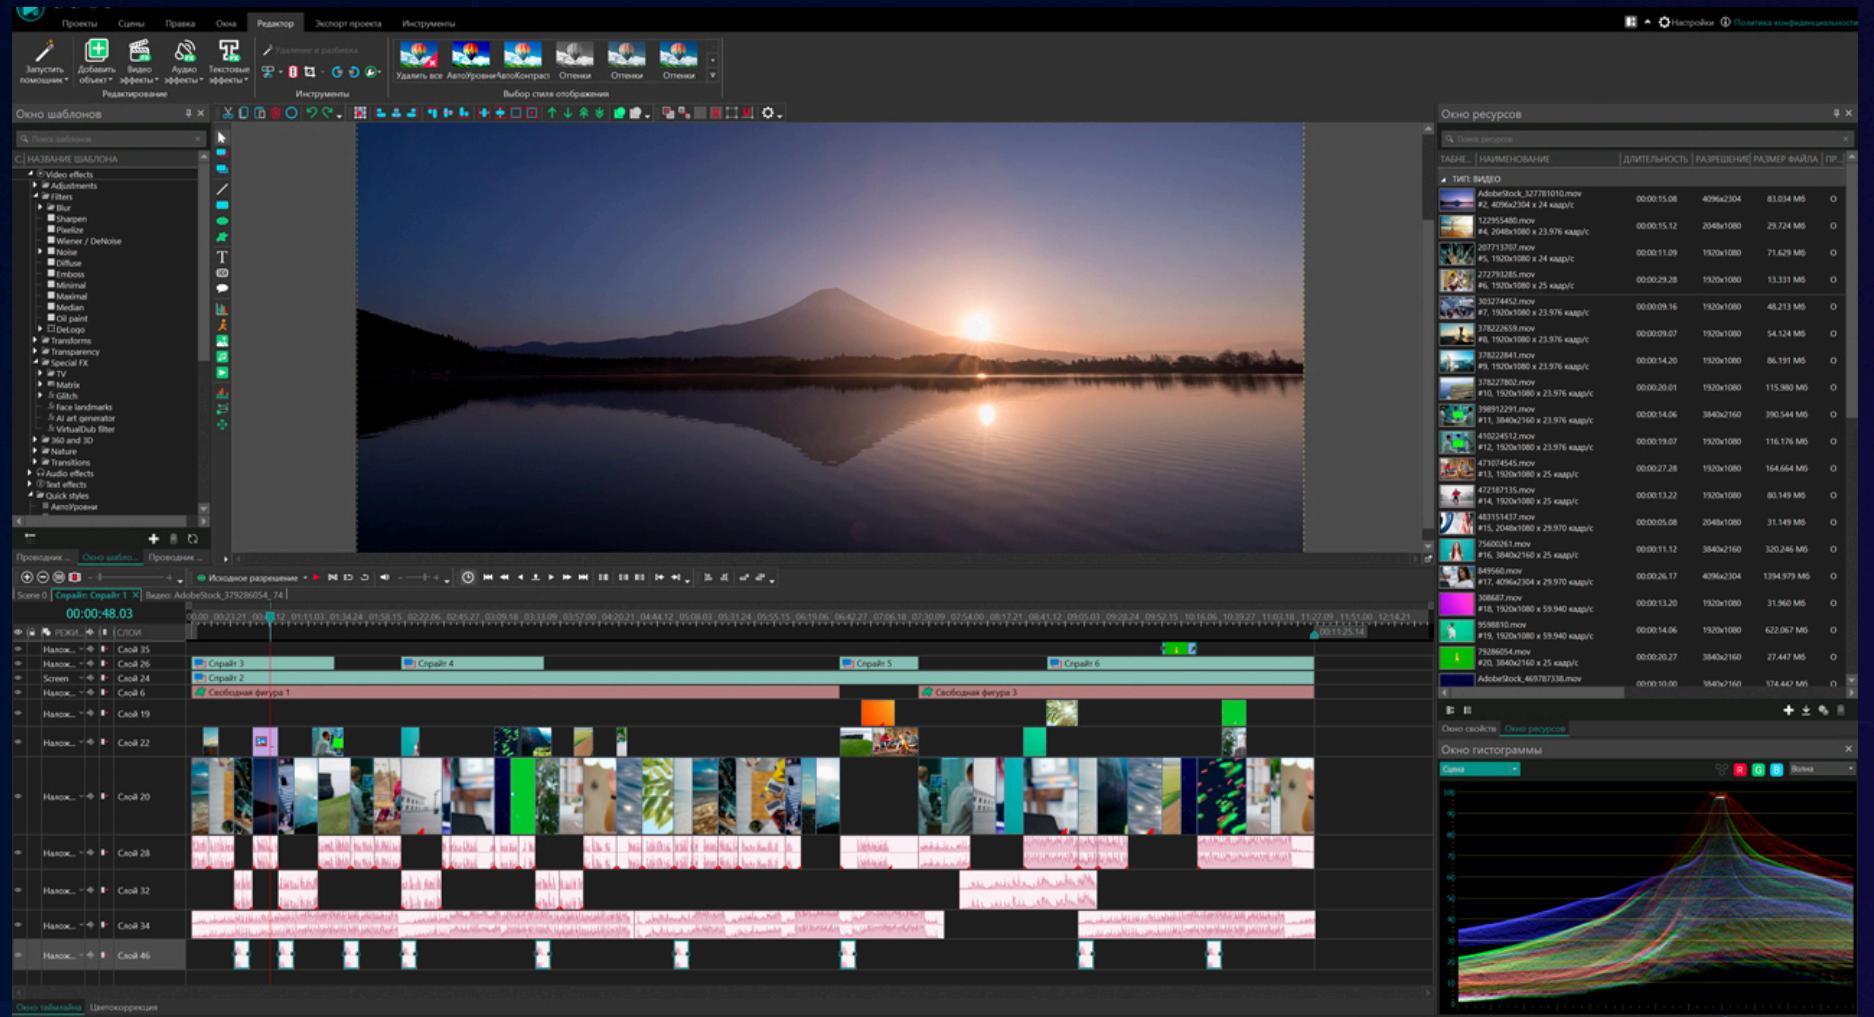

A young boy named Elias...

AI-powered end-to-end video studio for marketers, educators and creators.

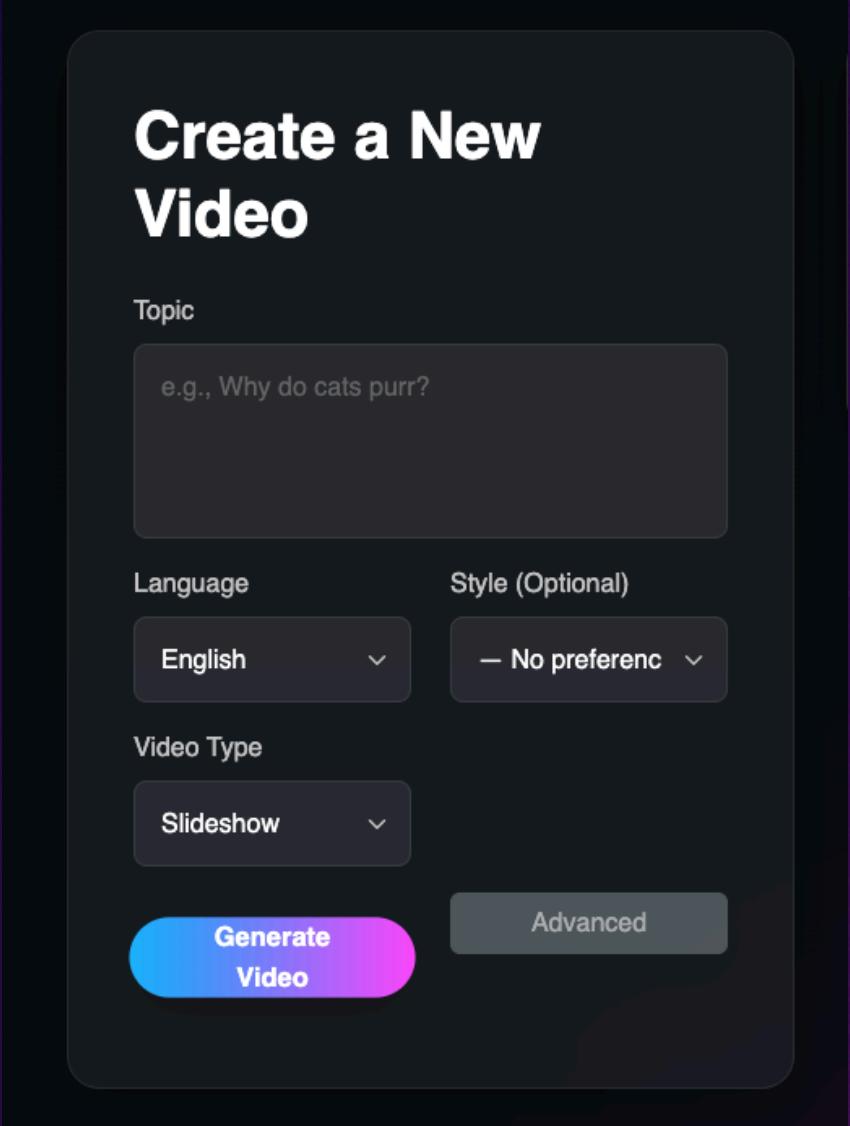

Ilia Tiushniakov · Founder & CEO · info@sharp-shark.com · Orlando

Video is still painfully slow and expensive

- 6 hours average editing time for a 90-sec clip
- \$300+ in freelance costs per asset
- Skill barrier blocks 95 % of would-be creators

Old way

Our way

Type a thought—get a finished video

- Generative script, images, voice, music & edit in one click
- Cloud or on-prem GPU pipeline—no rendering queues
- Output optimised for YouTube, TikTok, training portals

4-Step AI Pipeline

Idea → User types a concept or topic

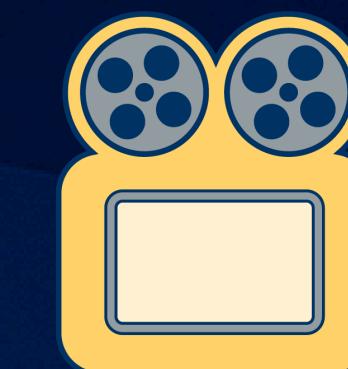

Script → LLM (GPT-4o / Claude) generates the script & scene plan

Visuals → Stable Diffusion + AnimateDiff create frames and animations

Voice & Music → XTTs generates voiceover, MusicGen composes soundtrack

Render → MoviePy merges everything, exports in HD / 4K

\$78 B global video-content spend (growing 15 % YoY)

- Initial beach-heads: SaaS marketing teams, YouTube producers, e-learning vendors
- Future upside: indie film pre-viz & rapid prototyping
- > 1 Bn knowledge workers need fast video every week

\$78B Market

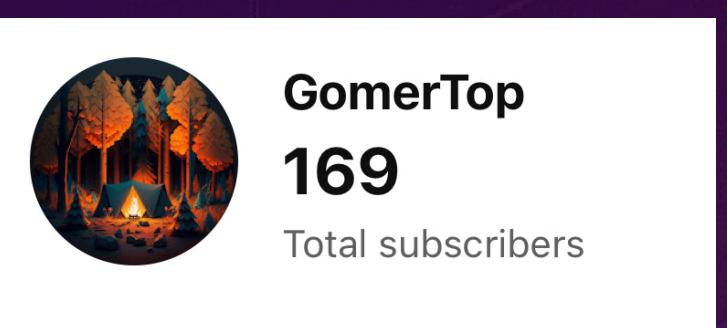

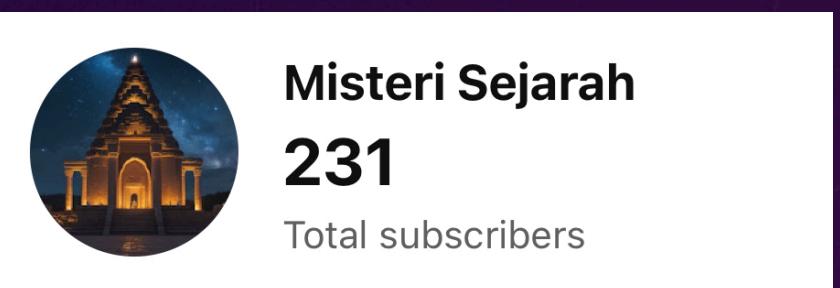

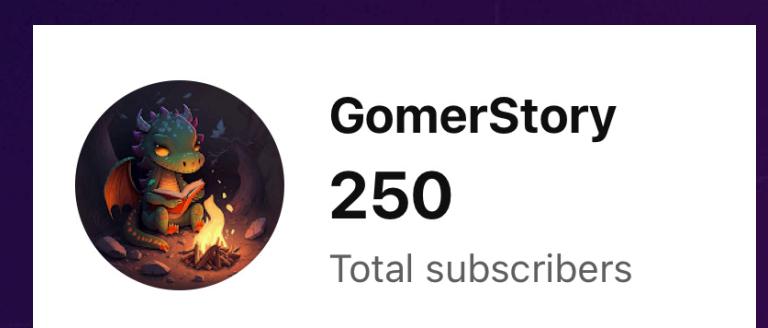

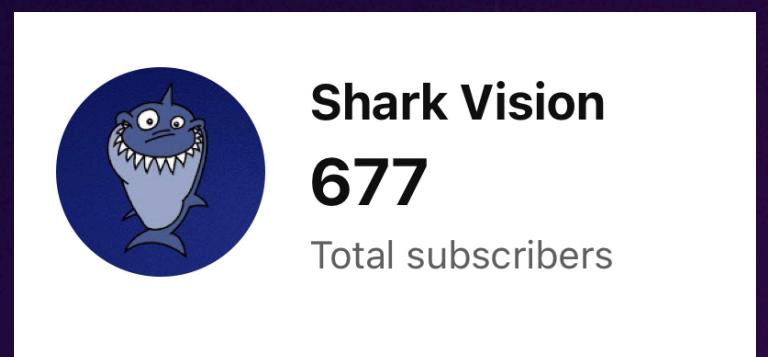

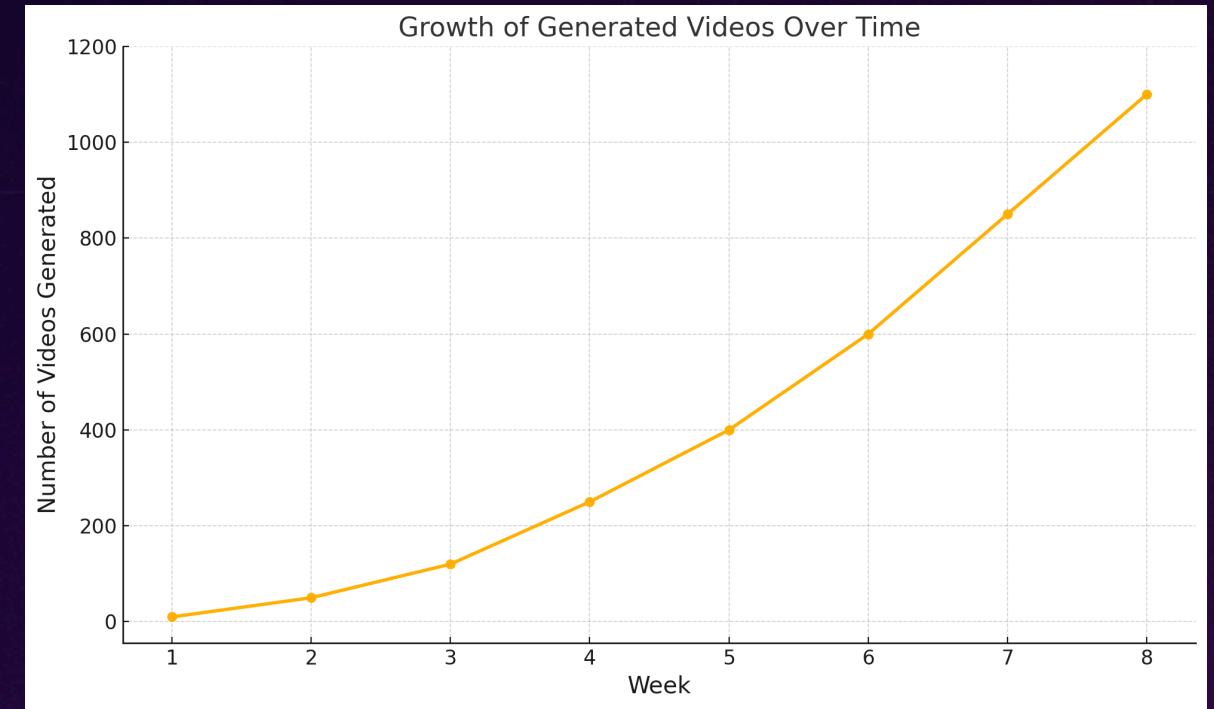

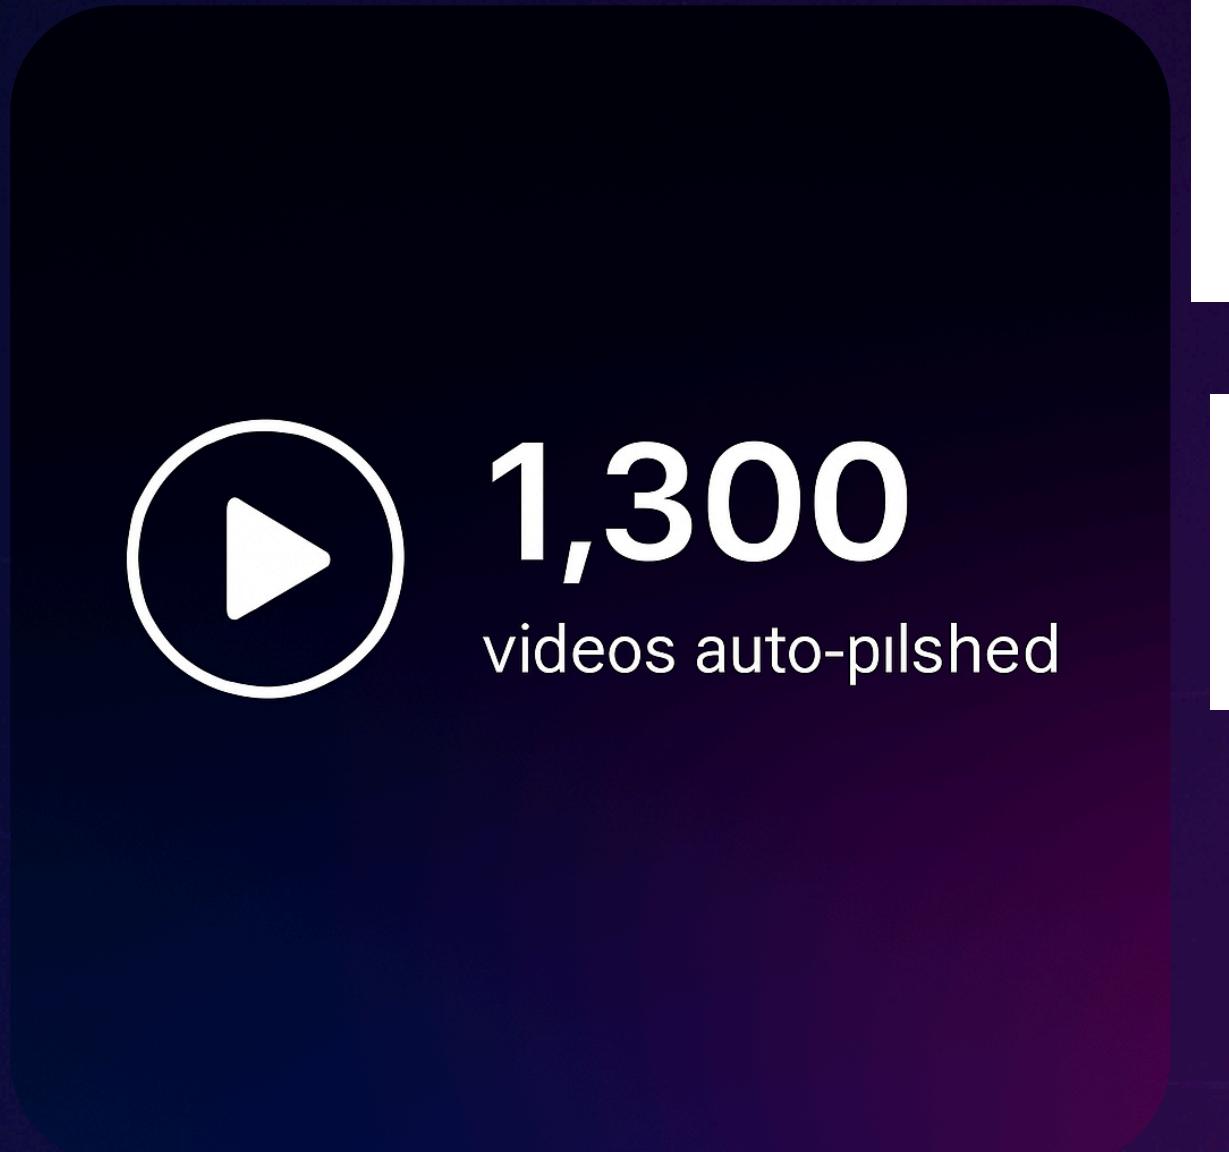

Competition & Why We Win

Faster • Cheaper • Fully automated

- **Runway** – great FX, manual assembly needed
- **Synthesia** – avatars only, no full scenes
- **Pictory** – slide-to-video, limited creativity
- **Sharp Shark** – full story + visuals + audio in 60 s, scalable on any GPU cluster or local rack

Proof of life—17 auto-run channels live

- 1300+ videos auto-published in 90 days
- Best channel grew 600 subs, 500 k views with zero ad spend
- Average cost per video <\$0.05

SaaS first, API second

- **Free Plan** — entry-level access with basic features and limited generation

- **Basic Plan** — daily video generation, higher export quality, token-based extra options

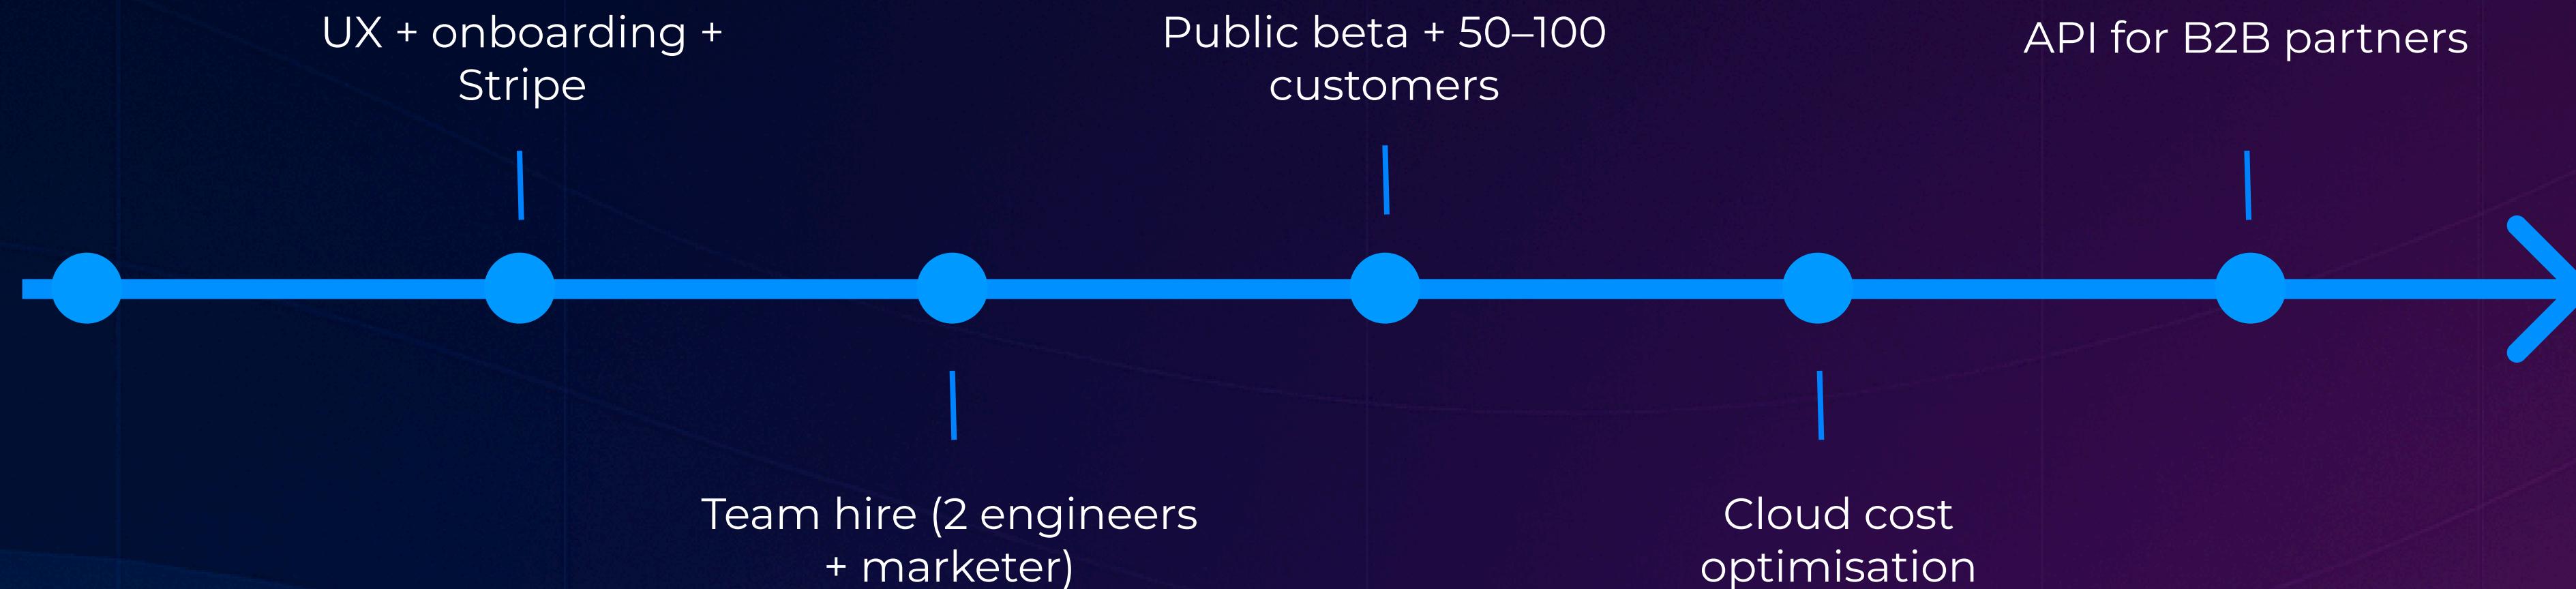

- **Pro Plan** — advanced video generation, highest quality, priority processing

- **API Access** — flexible pay-per-use model for agencies, platforms, and developers

Raising \$300k pre-seed SAFE to turn a proven MVP into a scalable business

- **Finalise UX**, improve onboarding, integrate Stripe billing — ~2 months
- **Hire 2 engineers** (backend + frontend) + 1 growth marketer — ~1 month
- **Launch public beta**, onboard 50–100 paying users — ~2–3 months
- **Optimise infra** with AWS/NVIDIA credits, prep for own GPU nodes — ongoing, starts month 1
- **Build and release API** for B2B partners — ~3 months

Built by an engineer who automates everything

Ilia Tiushniakov – 8 yrs DevOps & ML,
scaled infra to millions of requests/day
